Space Administration

John F. Kennedy Space Center

INTRODUCTION

The Material Safety Data Sheets (MSDSs) listed in this index reflect product inventories and associated MSDSs which have been submitted to the Toxic Substance Registry database maintained by the Base Operations Contractor at the Kennedy Space Center. The purpose of this index is to provide KSC Government, Contractor, and Tenant organizations a means to access information on the hazards associated with these chemicals.

The Toxic Substance Registry Service (TSRS) has been established to manage information dealing with the storage and use of toxic and otherwise hazardous materials at KSC. As a part of this service, the BOC Environmental Health Services maintains a central repository of MSDSs which have been provided to TSRS.

The data on the TSRS are obtained from NASA, contractor, and Tenant organizations who use or store hazardous materials at KSC. It is the responsibility of these organizations to conduct inventories, obtain MSDSs, distribute Hazard Communication information to their employees, and otherwise implement compliance with appropriate Federal, State, and NASA Hazard Communication and Worker Right-to-Know regulations and policies.

MSDS Listing by Tradename	Appendix B
MSDS Listing by Stock Number	Appendix C

Toxic Substance Registry

1. Purpose

This Registry has been developed as a means to identify hazardous materials stored and used at the Kennedy Space Center. The Registry is also available for use by KSC organizations as a tool to aid in compliance with Federal Hazard Communication Regulations.

2. Toxic Substances Registry System (TSRS)

a. Hazardous Material Inventory

The TSRS is comprised of both computerized database and paper files of Hazardous Material Inventory Information and Material Safety Data Sheets (MSDS). The computerized database resides on the IBM-compatible Amdahl 5890 System 1 mainframe at the Central Instrumentation Facility.

Accessible on-line files in the database include both hazardous substance inventory information and MSDSs. Hazardous substance inventory files include information on product manufacturers and distributors, chemical composition of products, user organizations, locations of product storage and use, disposal routes, and annual inventory information such as quantity on hand at time of inventory and annual usage. The database also includes an on-line file of MSDSs for products available through the Defense Logistics Agency.

Access to the on-line data is available through personal computers with appropriate communications software, modem, and password. Linkage to the mainframe is accomplished through either KSDN or direct line, or NASANET connection.

b. Material Safety Data Sheets

The MSDSs in the TSRS are maintained at the Environmental Health Facility (L7-1557). Available MSDSs may be obtained from the TSRS files by request through the KSC mails system, facsimile transmission, or by courier pick-up. MSDSs not listed in this Index should be submitted to the TSRS as they become available to the user organization.

3. Computer Access to TSRS

Access to the on-line data is available through personal computers with appropriate communications software, modem, and password. Linkage to the mainframe is accomplished through either KSDN or direct line, or NASANET connection.

Organizations with IBM-compatible PCs and appropriate communications hardware and software may request access to the TSRS by submitting a KSC Form 28-399NS, "BOC Computer User Responsibilities Acknowledgement" and a KSC Form 28-269, "Request for Computer Access" to TSRS at Mail Stop BOC-022.

Assistance in completing the form may be obtained by contacting TSRS at 867-2400.

4. MSDS Requests

Material Safety Data Sheets for products listed in this index may be requested from the TSRS Inventory at Mail Stop BOC-022 using KSC Form 29-393 "Material Safety Data Sheet Request". As a minimum, the request(s) should include information needed for MSDS retrieval such as TSRS ID Number, product name, manufacturer, and other identifying information as required. Facsimile transmission of single MSDSs may also be requested by contacting TSRS at 867-2400 during normal business hours. All requests for MSDSs should be routed through the individual(s) previously identified to TSRS assigned that responsibility by their organization.

5. Submittals to TSRS

a. Government, Contractor, and Tenant organizations are required to submit MSDSs and annual Hazardous Material Inventory records to TSRS as required by NHS/IH 1845.3, "NASA Health Standard On Hazard Communication" and KMI 1800.2 "Hazard Communication". Submittals should only be made through the appropriate organizational element bearing that responsibility, which has previously been identified to TSRS. New inventory information will be submitted to TSRS at Mail Stop BOC-022 using KSC Form 28-185, "Toxic Substances Registry System Inventory" or equivalent format. Annual updates to previously provided information will be submitted on printed update reports provided by TSRS, or by other means acceptable to TSRS. Entry / updates may be provided through direct linkage to the AMDAHL 5890 for users with approved access.

b. MSDSs not listed in this Index should be submitted to the TSRS as they become available to the user organization.

6. Emergency Requests

During normal business hours (0730-1600, Mon.- Fri.), telephone requests for MSDSs directly to TSRS at (407) 867-~~3152~~.

2400

After normal working hours, on holidays, and weekends, contact the BOC Duty Office at (407) 867-5050.
